ZOOMLION ANHUI INDUSTRIAL VEHICLE CO.,LTD

ADD:Building 2,NO.1Nanwei Road,High-tech Development Zone,Wuhu,Anhui,China TEL: 0553-3020328 WEB: www.zoomlionfl.com

Zoomlion Anhui Industrial Vehicle Co., Ltd.is one of the important sectors of Zoomlion Group, established in 2010, covering an area of nearly 300 acres with the total investment of 600 million yuan. After second phase project it will have an annual output of 30,000 units of production capacity for industrial vehicles. The modern factory and process layout, advanced production equipment beckon Zoomlion "sincere and modest, profound and long-standing" brand connotation.

Relying on Zoonmlion advanced technology and process equipment in professional manufacturing field, our product creativity is improved effectively and the product resource combination is formed, which can meet demands of the mainstream markets at home and abroad. It has now formed the internal combustion type, battery type, storage type, 209 kinds of forklift products resources. Currently, Zoomlion forklift products have been widely used in papermaking, automobile, tobacco, logistics, stone material and other industries.

Sticking to the idea of "providing high quality service by adopting exquisite technique", our company attaches much importance to customers various demands in different stages, such as purchase, usage, maintenance, update, etc. In addition, we bring our customers pleasure, touched and added economic interests by providing intimate service.

Through Call Center, Internet, Remote Assistance, On-the-spot Operation and other modern innovative service modes, our company formed and consolidated the dominant position of Zoomlion forklift in the field of after-sales service.

■ TECHNICAL FEATURES

Safe & Green

- Protective measures are provided for the parking brake.
- The vehicle emission complies with the latest China's environmental protection standard.
- The grid type roof is employed so that the operation field of sight is excellent and reliability
 The middle exhaust tailpipe is installed to effectively prevent dust raising due to low exhaust.
- The fork carrier made of J-type steel channels with composite rollers is used for vehicles of 2-3.5t to stabilize the starting and provide high strength.2.

Advanced design

- The running speed is increased and operation efficiency is improved.
- The tail of the counterweight sees a ventilation area that is increased by 10% to further facilitate the cooling.
- The sedan-type double-handle combination switch is configured to ease and facilitate the operation.
- Connections between steering axle and frame are shock-absorption treated, lowering the vehicle vibration by 30%.
- Compared with vehicles of the same series of other brands. this vehicle enjoys great weight, stronger load-bearing capability and high cost performance.
- The vertical buffer function is designed for the lifting system so as to effectively decrease the impact and shock of the mast.

Comfortable & practical

The vehicle is applied with brand new coating with a fresh and attractive tone. The color is matched more reasonably and delighting.

- The wide steps and broad driving space is provided to decrease the fatigue due to operation
- Conical sealing is adopted for the rubber pipes and joints in the hydraulic lines, which enjoys satisfactory sealing effect and no oil leak for long.
- The control stick arrangement is optimized with brand new control handle and wide operation space, making operation more comfortable.
